BRING IT

SELECTED PROJECTS

From Client Interest to validated requirements

requAlre turns a client's initial idea into a structured SRS, combining market intelligence with structured requirements to surface gaps, inconsistencies and dependencies.

Live Requirements Engineering at MOQO Summit

requAlre captured and validated requirements during a live event used immediately by the dev team for prioritization and development.

ERP selection from 20 vendors to 2 finalists

requAlre guided the requirements process, comparing 20 ERP vendors and narrowing them down to 2 finalists for management decision.
